

# bwin casino ruleta y slots

To calculate your potential payout on an underdog, all you need to do is multiply your stakes (the amount of money it wagers) by the value resulting from the odds. Put simply: Potential profit = Wager x (Odds/100)..

Example: If you bet \$300 (net \$200) on a team with odds of 1.5, your potential profit is \$300 x (1.5 - 1) = \$150.
