

bet 667

Good mornig ,
I think it s really good BT maybe they could add more things or maybe t
ry
harder to do 💵 better. For example the could may use more cha
racters, I know they can
make this game a popular game of 💵 the week or even month. An
yways maybe they could add
unique powers to each character. Like maybe you reach a 💵 rar
e level and you could get a
new character you could get to another rare level on and on lock €
181; their unique power or
skill and do that for every character they unlock that my second sugge
stion.
And my
third one 💵 is you could add a fever to when the beat a level
to be more interesting.
Again for example like 💵 the game stack fall... every time yo
u don t stop or if you keep
holding the button to go down without 💵 hitting the black lin
es you re able have a
sparking glow before you go down faster and go down being able ㈒
1; to go through the black
lines.
What I m trying to say is if we go through enough levels and not die &
128181; we could
💵 have a rainbow color when we play instead of the random colors. Then w
e could be able
to 💵 take a lot of hot and slow down time and be able to move
faster. Although of course
💵 there s a 💵 catch to that the game gets 4x harder and the bet
ter you do without dying it
💵 get 2x harder every 💵 level you beat without dying that my th
ird and final suggestion,
💵 anyways besides all those suggestion the game is really 💵 add
icting a can t lie. Even
💵 though I just started I can t wait to get far in the game!
💵
