What is Aviator?

Aviator is an online real-time game of skill that combines luck and skill. The game takes players on an aircraft that takes off and climbs continuously on a chart, with a growing multiplier that increases as the plane flies. The longer the plane stays in flight, the larger the multiplier grows, resulting in greater potential winnings for the player.

How to play Aviator?

Playing Aviator is simple. First, the player must select their preferred bet value. Next, they must wait for takeoff. As the plane flies higher and higher, the multiplier grows larger in real time. When the player decides to cash out, they hit the "Cashout" button to land the plane and collect their winnings. Be cautious; if the plane takes off the chart, you'll lose your bet.

Here are some tips and strategies to help you maximize your winning potential when playing Aviator:

1. Manage your finances carefully, and don't bet money you can't afford to lose.
